## La sfera del clima arriva a Locarno

 Save to favoritesShare:    

The Climate Sphere is a sphere approximately three meters high. It provides information on climate change and collects the opinions of passers-by on various measures for a sustainable society. The traveling exhibition visits public places throughout Switzerland, collects ideas and finds common denominators among the population.

With music, performances, children's shows, dance, games... Theatrical show: Friday 14 June, from 5pm to 7pm.

in collaboration with the BastaPoco Association and GreenPeace Ticino, and with the support and support of the City of Locarno
